Status	Finished
Started	Friday, 9 October 2026, 10:31 PM
Completed	Friday, 9 October 2026, 10:35 PM
Duration	4 mins 17 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Complete

Mark 1.00 out of 1.00

In Merge Sort, what happens after the two halves of the list are sorted?

- a. They are discarded
- b. They are compared element by element
- c. They are combined to form a single sorted list
- d. They are split again into smaller sublists

The correct answer is: They are combined to form a single sorted list

Question **2**

Complete

Mark 1.00 out of 1.00

Why is it advantageous to sort data before performing duplicate analysis?

- a. It allows for quicker identification of duplicates
- b. It has no effect on the analysis process
- c. It complicates the analysis process
- d. It makes the analysis slower

The correct answer is: It allows for quicker identification of duplicates

Question **3**

Complete

Mark 1.00 out of 1.00

What is the primary advantage of the divide-and-conquer approach in sorting algorithms?

- a. It only works on small datasets
- b. It simplifies the sorting process by using only one pass
- c. It avoids the need for recursion
- d. It allows for efficient parallel processing and sorting of data

The correct answer is: It allows for efficient parallel processing and sorting of data

Question **4**

Complete

Mark 1.00 out of 1.00

What does the Bubble Sort algorithm primarily focus on during each pass?

a. Dividing the list into halves
b. Bubbling up the largest element to its correct position
c. Sorting the entire list in one pass
d. Bubbling up the smallest element

The correct answer is: Bubbling up the largest element to its correct position

Question **5**

Complete

Mark 1.00 out of 1.00

What is a characteristic of the merge sort algorithm?

a. It sorts data using a single pass
b. It is based on the divide-and-conquer approach
c. It does not require recursion
d. It is less efficient than bubble sort

The correct answer is: It is based on the divide-and-conquer approach

Question **6**

Complete

Mark 1.00 out of 1.00

_____is putting an element in the appropriate place in a sorted list yields a larger sorted order list.

a. Selection
b. Insertion
c. Distribution
d. Extraction

The correct answer is:
Insertion

Question **7**

Complete

Mark 1.00 out of 1.00

Which Python function would you use to sort a list in-place?

a. arrange()
b. sort()
c. order()
d. sorted()

The correct answer is: sort()

Question **8**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is based on repeatedly dividing the list into halves?

a. Bubble Sort
b. Insertion Sort
c. Merge Sort
d. Quick Sort

The correct answer is: Merge Sort

Question **9**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm would be preferred for its divide-and-conquer approach?

a. Binary Search
b. Merge Sort
c. Bubble Sort
d. Linear Search

The correct answer is: Merge Sort

Question **10**

Complete

Mark 1.00 out of 1.00

Algorithm design technique used in merge sort algorithm is

a. Greedy method
b. Dynamic programming
c. Backtracking
d. Divide and conquer

The correct answer is:
Divide and conquer

Question **11**

Complete

Mark 0.00 out of 1.00

Very slow way of sorting is_____

a. Quick sort
b. Heap sort
c. Bubble sort
d. Insertion sort

The correct answer is:
Insertion sort

Question **12**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is known for its simplicity and sequential comparison of elements?

a. Bubble Sort
b. Quick Sort
c. Heap Sort
d. Merge Sort

The correct answer is: Bubble Sort

Question **13**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is described as making multiple passes through a list, comparing elements, and swapping adjacent items that are out of order?

a. Quick Sort
b. Bubble Sort
c. Merge Sort
d. Insertion Sort

The correct answer is: Bubble Sort

Question **14**

Complete

Mark 1.00 out of 1.00

Why is sorting important for selection operations?

a. It makes it easier to select items based on their relationship to the rest of the items
b. It slows down the process
c. It complicates the selection of items
d. It makes the data unsorted

The correct answer is: It makes it easier to select items based on their relationship to the rest of the items

Question **15**

Complete

Mark 1.00 out of 1.00

What is Bubble Sort known for?

a. Being the most efficient sorting algorithm
b. Bubbling up the largest element to its correct position with each pass
c. Using the divide-and-conquer approach
d. Sorting data in a non-sequential manner

The correct answer is: Bubbling up the largest element to its correct position with each pass
